

POOJA DEVI

DATABASE ANALYST - Database Management, Reporting & Data Visualization

✉ Poojadevi.pd03@gmail.com ☎ [+1\(548\)-255-2396](tel:+1(548)-255-2396) 📍 [Ontario](#) [in LinkedIn](#)

SKILLS

- **Programming Languages:** Java basics, SQL queries, C programming, systemized syntax, database handling
- **Web Platforms:** HTML markup, XML schemas, data formatting, integration workflows and content rendering
- **Data Visualization:** Power BI, Tableau reports, interactive charts, trend analysis and performance monitoring
- **Cloud Platforms:** AWS services, scalable storage, compute resources, deployment pipelines cloud integration
- **Office Productivity:** MS 365 Suite, Excel analytics, Word documentation, Slidewares visuals, SharePoint

WORK EXPERIENCE

Picker & Packer

September 2025 - December 2025

Grey Tool

Ontario

- Executed order picking and packing for 250+ products daily, sustaining 99% fulfillment accuracy and eliminating shipment discrepancies.
- Validated 300+ SKU entries daily using barcode scanning and warehouse management systems, maintaining real-time inventory database integrity.
- Coordinated warehouse assembly, order labeling, and shipment preparation for 150+ units daily, achieving zero quality control defects.
- Optimized retrieval routing and zone coordination for 200+ product units, reducing order processing time.

Junior Data Analyst

August 2023 - August 2025

Top Talent Bridge

- Analyzed 200+ candidate and client records using Excel, SQL, and Power BI, improving reporting accuracy and reducing manual processing by 25%.
- Developed KPI dashboards tracking time-to-hire, conversion rates, and engagement metrics, strengthening decision-making efficiency by 20%.
- Generated automated reporting models and forecasting insights, supporting recruitment strategy optimization and stakeholder reporting.
- Performed data cleansing, validation, and trend analysis using Python, increasing matching success rate by 15%.

Receiving Associate

October 2022 - December 2022

Amazon Fulfillment Centre

Ontario

- Inspected and processed 400+ inbound units daily using barcode scanners, ensuring quality compliance and defect identification.
- Recorded and validated inventory transactions for 500+ products daily, maintaining warehouse database accuracy and stock visibility.
- Conducted shipment verification and discrepancy reporting across 300+ weekly deliveries, reducing receiving errors by 25%.
- Executed pallet unloading, staging, and material transfers across 50+ shipments, improving receiving throughput.

PROJECTS

Microsoft Power BI Desktop for Business Intelligence

Academic Project

- Engineered data pipelines integrating 10+ heterogeneous data sources using Power Query transformations, improving data accuracy by 35%.
- Developed enhanced star-schema data models and 30+ advanced DAX measures, accelerating query performance by 25% and strengthening KPI analytics.

Database Performance Analysis and Optimization

Self Project

- Designed and normalized relational databases across 15+ tables using 3NF standards, ensuring complete referential integrity and structured transactional storage.
- Optimized 50+ complex SQL queries through indexing, execution plan tuning, and stored procedures, reducing execution time by 40% and enhancing retrieval performance.

EDUCATION

Graduation in Cloud Data Management

May 2022 - August 2023

Doon Campus, Kitchener, Ontario, Canada

Master's in Computer Application

April 2014 - June 2016

Khalsa College Lyallpur, India
